

Dear Fellow Educator:

Thank you for bringing your school to participate in our classroom program entitled *It All Flows to Me*, funded by the Water Replenishment District (WRD). This multi-faceted watershed education program was designed to increase public awareness about water pollution and demonstrate how pollution can impact our oceans and drinking water supply.

We would like to continue to build upon the information that your students have learned at the Aquarium and have included a packet of materials that consist of three lesson plans for you to use in the classroom. Each lesson focuses on ground-water, pollution, and conservation, and how it relates to people and animals. We have also included a packet of vocabulary terms and concepts used throughout the class to assist you in discussing these topics with your students. We hope these materials will be useful tools to use in your classroom.

In order to improve upon this program and provide important feedback to WRD, we have also enclosed the following items to be copied and distributed to each participating class:

1. A program evaluation to be filled out by teachers who attend class at the Aquarium.
2. A letter to parents/guardians and students along with a student evaluation survey of the class.

Please collect the above items from participating teachers and students and mail these forms back to:

**Aquarium of the Pacific
Education Department
100 Aquarium Way
Long Beach, CA 90802**

Thank you again for your help in collecting these evaluations, and if you have any questions please call 562.591.3164.

Respectfully,

The Aquarium of the Pacific Education Department
