

"It All Flows to Me"

Aquarium Program Follow-up

Your Behavior Affects the Environment

Directions

Read the following scenarios and answer the questions that follow.

While you are hiking, you decide that you are thirsty and hungry. You reach into your backpack and pull out your water bottle and a granola bar for snack. You look around for a trash can but do not see any in plain sight.

If you can not find a trash can, what could you do with the water bottle and granola wrapper? Explain.

Your parents need an oil change on their car. While waiting for the car to be finished, you see the mechanic dump the old oil in the street.

Explain how this action affects the environment.

What is an environmentally friendly way to rid of the oil?

You are about to take your anxious dog for a walk. Before leaving, you need to grab some important things for this activity.

List the items you need to grab for walking your dog:

A friend of yours is building a garden of different kinds of vegetables. She wants to make sure bugs stay off of the plants.

What advice can you give her about using pesticides, chemicals to keep animals from eating her plants?

Aquarium Program Follow-up Pollution Sources

Directions

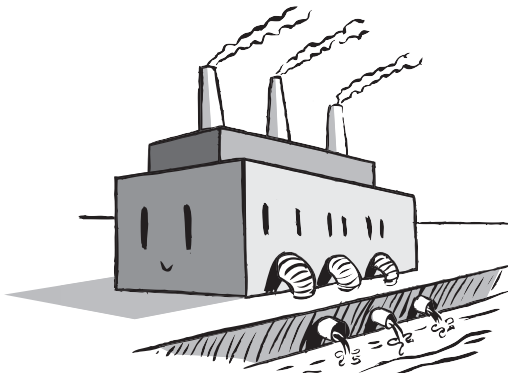

Select the correct answer below.

1. ☐ Point-Source Pollution.
☐ Non-Point Source Pollution

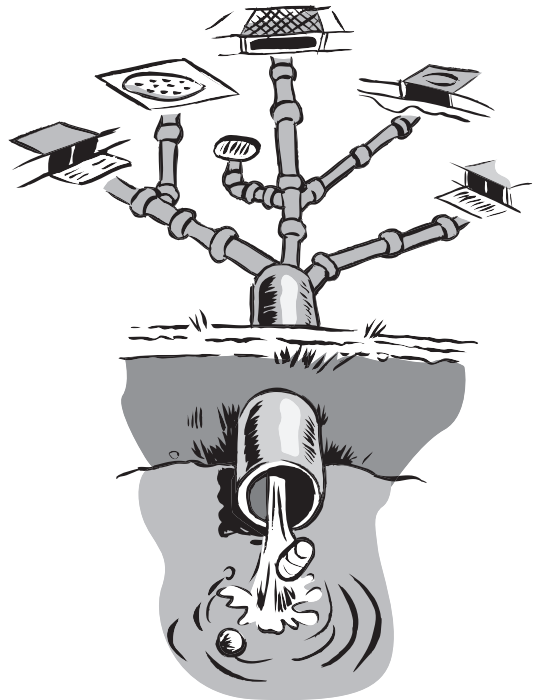

2. ☐ Point-Source Pollution.
☐ Non-Point Source Pollution

3. ☐ Point-Source Pollution.
☐ Non-Point Source Pollution

4. ☐ Point-Source Pollution.
☐ Non-Point Source Pollution

5. ☐ Point-Source Pollution.
☐ Non-Point Source Pollution

While you are hiking, you decide that you are thirsty and hungry. You reach into your backpack and pull out your water bottle and a granola bar for snack. You look around for a trash can but do not see any in plain sight.

If you can not find a trash can, what could you do with the water bottle and granola wrapper? Explain.

I could hold onto the trash in my backpack until I find a trashcan. I could also keep the water bottle until I can recycle it at home or in an outdoor recycling bin.

Your parents need an oil change on their car. While waiting for the car to be finished, you see the mechanic dump the old oil in the street.

Explain how this action affects the environment.

The oil will make its way into our storm drains which empty into the ocean. This will smother animals and block photosynthesis.

What is an environmentally friendly way to rid of the oil?

The mechanic and others who change their oil need to dispose of it in a hazardous waste dump or take it to a motor oil collection center.

You are about to take your anxious dog for a walk. Before leaving, you need to grab some important things for this activity.

List the items you need to grab for walking your dog:

Gloves, Pooper Scooper, Baggies, Leash

A friend of yours is building a garden of different kinds of vegetables. She wants to make sure bugs stay off of the plants.

What advice can you give her about using pesticides, chemicals to keep animals from eating her plants?

She could plant native plants that have few natural predators. She could use a safer form of pesticide.
