

# Stingray Hand Puppet

*Stingrays have flattened bodies, which is great for a hand puppet*

**What you'll need:** Printer paper, glue or tape, and something to color with

## **How to make your hand puppet:**

1. Cut a strip of paper from the short edge, this will be your puppet handle on the underside.
2. Draw the body of your stingray on the paper, this can be round, oval, diamond shaped, square, or whatever shape you would like.
3. Color and cut it out!
4. Do this for the tail too, you can make your tail short and wide or long and thin, or however you want it to look.
5. Tape or glue the tail to the underside of the body like in the picture.
6. Tape or glue the puppet handle to the underside.
7. If you haven't added some of the fun parts, like gills, eyes, spiracles, and a mouth go ahead and add those!
