

# Build a Polar Bear Den

1. Identify a place in your home that has furniture or structures you can use to build your polar bear den.
2. Polar bears often make the entrance to their dens facing south. So if you'd like to be really accurate, find out what direction south is in your home and build your den with the entrance on the south side!
3. Gather sheets, blankets, pillows and any other supplies that you may be able to drape over the tops of the furniture to create your den, and hold sheets and blankets in place.
4. Can you create different chambers, like rooms, in your den?
5. Decorate the inside of your den however you'd like.
6. Enjoy a favorite meal, play some games, or however you want to have fun in your den protected from the cold, arctic winter!
